EBRC

## eBRC PCI-DSS certified

Shortly after its ISO 27001 (information security) and ISO 20000 (IT Service management) certifications, ebrc is proud to be the first hosting and ICT Managed Services company in Luxembourg to be granted with this prestigious certification for the Payment Card Industry – Data Security Standard (PCI-DSS).

PCI-DSS is a key certification for major e-business and e-commerce players with online electronic transactions. It was initiated by the main credit card vendors (VISA, MasterCard, American Express) in order to manage the evolution of the Payment Card Industry and increase the security levels.

Managed service clients can now delegate the responsibility of PCI compliancy to ebrc for their platform requirements.
